

PUSPENDU GORAI

Aspiring Full-Stack Developer & AI/ML Engineer

Durgapur / Barasat, West Bengal, India | puspendugorai74@gmail.com | +91 8509151922 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Third-year B.Tech (CSE – AI & ML) student at Brainware University with hands-on experience building full-stack web applications and AI-powered tools. Comfortable across HTML, CSS, JavaScript, React and Node on the front end, and Python, Flask and SQL on the back end, with practical exposure to NLP, LLMs and RAG-based AI systems. Strong foundation in data structures, algorithms and OOP, with a habit of shipping and documenting real projects on GitHub. Seeking an internship to apply and grow these skills on production-grade software.

EDUCATION

B.Tech in Computer Science & Engineering (AI & ML)

2023 – 2027 (Expected)

Brainware University, Barasat, West Bengal — Currently in 3rd Year

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, TypeScript, SQL

Web Development: HTML5, CSS3, React, Node.js, Flask, REST APIs, Responsive Design, Tailwind CSS

AI / Machine Learning: Pandas, NumPy, TensorFlow, scikit-learn, Hugging Face, LLMs, RAG architecture, LangChain, Groq

Databases & Tools: MySQL, PostgreSQL, SQLite, Supabase, Git & GitHub, Docker, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS fundamentals

PROJECTS

AI Resume Analyzer

Python · Streamlit · Groq · LangChain

- Built an AI-powered resume analysis tool using Groq-hosted LLMs orchestrated with LangChain, with an interactive Streamlit interface for instant scoring and feedback.

AI Programming Chatbot

JavaScript

- Developed a browser-based chatbot with a clean, responsive UI to help users get real-time programming explanations and code suggestions.

Bank Management & ATM Web System

HTML · CSS · JavaScript

- Built a two-part banking simulation — a bank portal for signup/login and a connected ATM interface — implementing the full flow from account creation to withdrawal and balance checks.

Library Management System

JavaScript

- Created a web application to manage book records, track availability, and streamline issue/return workflows for a library.

Weather Application

CSS · JavaScript

- Built a weather lookup app with clean, condition-driven UI states, surfacing detailed real-time conditions for any searched location.

Personal Developer Portfolio

HTML · CSS · JavaScript · GitHub API

- Designed and built a fully responsive portfolio with animated UI, dark/light themes, and projects pulled live from the GitHub API — live at puspendugorai-coder.github.io/Portfolio

ACHIEVEMENTS & CONTINUED LEARNING

- Earned multiple GitHub badges (Pull Shark, Pair Extraordinaire, Quickdraw, Starstruck) for consistent open-source contribution across 10+ public repositories.
- Actively strengthening Data Structures & Algorithms, and deepening AI/ML skills in LLMs, Retrieval-Augmented Generation (RAG) and model deployment.
- Building full-stack expertise with React, Node.js and Flask alongside core software engineering fundamentals.
